

Bilr

## Making Billing Easy

Leveraging process automation, AI, machine learning and powerful data analytics to deliver revenue protection and profit margins to Law Firms.

LSG's Bilr Law Firm Services [LFS] is a cloud-based legal billing application with speech-to-text and mobile-ready features, designed to create demonstrable financial value for law firms.

Bilr provides a streamlined user experience for attorneys, billing clerks, CFO's and managing partners through web and mobile functionality, in-app automatic claims management and 24/7 supportive services.

## Has time recording been your **dreaded month-end chore**?

Time to turn time recording into a revenue opportunity!

Bilr lets lawyers submit invoices on the go by just talking into their mobile or web friendly devices, saving hours of time. Invoices will also be preemptively run through a proprietary and proven pre-validation claims management solution, ensuring average revenue increases of 6-11% via time recording and billing accuracy improvements. This solution has already delivered revenue increases to firms for well over a decade.

With saved time and increased revenues, time recording will become a means to increase profits.

## How Bilr Works?

Bilr's AI-powered technology gains a thorough understanding of your business based on information gathered from past performance records, current activities to provide flawless future projections and efficient organisation that is compliant with regulatory requirements.

# Medium- to large law firms are switching to cloud-based billing and pre-submission case management solutions.

As a cloud-based solution, Bilr is device-agnostic, mobile-friendly, secure, and requires minimal IT support. Delivered in native iOS and Android, Bilr is also supported by a back-end blockchain database and fully complementary desktop version, to cater to users from law firms to general third-party vendors.

Simplify running your firm with LSG's leading cloud-based software for legal practice management.
