

Press Release

LSG Announces ISO/IEC 27001:2005 Certification

New York, 16 June 2014: LSG, the leading software application and business process outsourcing company, has been bestowed upon with the ISO/IEC (International Organization for Standardization/International Electrotechnical Commission) 27001:2005 certification. This certification is given to organizations that fulfill specific requirements of the ISO/IEC 27001:2005 international standard. The audit was conducted by BSI Group.

The qualification for the ISO/IEC 27001:2005 includes establishing, implementing, operating, monitoring, reviewing, maintaining and improving a documented Information Security Management System, given the risks the business undergoes. Key security control areas such as risk assessment, threat mitigation, asset management, network security, operating system controls, and user registration are important factors considered during the certification audit conducted by independent assessors.

Gary R Markham, Chief Executive proudly remarked "it is of great honor to be certified with the ISO/IEC 27001:2005 standards after much hard work by everyone at LSG. We take great pride in the security measures we have to protect our clients and to meet their standards."

About LSG

LSG is a leading software application and business process outsourcing company with a global network of offices in Europe, North America and Asia-Pacific. It specializes in the areas of procurement, and vendor and litigation management. The company delivers sustainable and demonstrable financial and business benefits for its clients via proprietary applications and support solutions. These solutions enable electronic procure-to-pay engagements to be facilitated in the general insurance, claims, legal, banking, finance, mining, construction and energy industries. LSG serves clients in more than 70 countries.
